**FDEV**  
*Bring U the best*

**KIEN HOP FDE GLOBAL IMEXTRA CO., LTD**

ISO

- ISO9001

## *The Import standard*

- Every imported lot has its own lot number, so that the inspectors can easily recognize and manage the information of the lot as well.
- Each lot no has its own limited use
- Before come in to the warehouse, It's necessary to check the quantity of each shipment to make sure that will match the requirement quantity.

- Base on the lot no, the inspector can check the appearance of the product. Is that packaging in good status ? Does it wet and has any gash ? Etc...
- Check the technical specifications of the imported goods by taking samples and test the measure, the thickness, and the stickness of the material. In addition, hand and eyes examination are performed base on the specifications in the TDS, MSDS.
- Every products has the supplier label with full information such as production name, code name, code items, size, date of manufacture and the limited date..

## *Export Standard*

- Each Shipment has its own lot number in the order received from the customer, so that the shipper can easily identify and manage the information. The inspectors shall base on the lot number to recognize what is first imported then export the shipment in the process: First in first out.
- Each shipment has its own delivery date base on the customer order. The Shipper will check the delivery date base on the customer schedule which were sent by email or inform via phone.

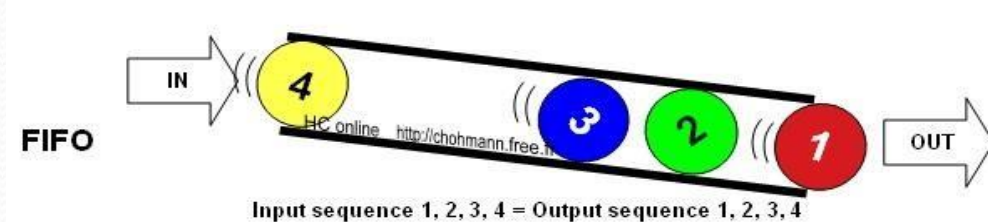

- Before the goods are shipped, the inspector must base on the rerquire quantity which already sent by customer and check the quantity of the goods in the warehouse by comprasion, couting, caculation ... Carefully before ship out of the warehouse.
- Check the technical specifications of the imported goods by taking samples and test the measure, the thickness, and the stickness of the material. In addition, hand and eyes examination are performed base on the specifications in the TDS, MSDS

- Before the goods will be shipper, the inspector must to check the packaging. Does it in the good status? Does it wet or has any gash on it ? etc....
- Make sure every product has its own supplier label with all the necessary information, the product name, code name, code item, size of the goods, date of manufacture, expiry date...

## *The warehouse management standard*

- First in first out is our main management standard

To make sure about the quantity and the best before date of the goods.

- Making the tracking tract for every Im-ex shipment to manage all the relate information.

- Before the goods will be shipped, the quality control department have to check If the export shipment complies all the rules or not ? Does the product quantity match with customer requirement ? And make sure the quality is in the goods standard.
- After all, The products met the standard will have the label on it and ready to be shipped to customer.
